

Video Surveillance Engineer

Training and Certification

This course is devoted to assist clients in becoming familiar with general surveillance system products. It aims to improve the efficiency of equipment installation, function operation and configuration, and problem troubleshooting. At the same time, it helps clients learn how to accurately select products and engage in the system design of complete video solutions according to requirements.

GEN-DHSA

Candidates

Those beginning their career in the video surveillance industry.

Requirements

Those who have a basic understanding of video surveillance system and computer networks.

Duration

1 days

Objectives

- Familiar with the basic knowledge and common tools of video surveillance solution.
- Understand the features of general products in video surveillance solution.
- Understand the basic knowledge of network and grasp basic network debugging ability.

Training Tracks

Theory →

After completing this course and scoring over 75 or above on the exam, you will receive a **GEN-DHSA** certificate.

Time Table

Course	Duration (Day)
Basic Knowledge and Common Tools of Video Surveillance Solution Design Training	0.5
Basick Knowledge of Network Training	0.5

Video Surveillance Engineer

This course is devoted to assist clients in becoming familiar with general surveillance system products. It aims to improve the efficiency of equipment installation, function operation and configuration, and problem troubleshooting. At the same time, it helps clients learn how to accurately select products and engage in the system design of complete video solutions according to requirements.

GEN-DHSP

Candidates

Engineers who are responsible for technical support and project implementation

Requirements

Those people who are familiar with Dahua general products.

Duration

4 days

Objectives

- Familiar with the basic features and applications of Dahua IP, HDCVI and transmission products.
- Familiar with function operation of IP and HDCVI solution including: preview, recording, PTZ control, alarm and event configuration, playback, backup, system maintenance and highlight functions.
- Familiar with VMS function operation for small and medium scale project: preview, recording, PTZ control, alarm and event configuration, playback, backup and highlight functions.

Training Tracks

Theory+ Practice →

After completing this course and scoring over 140 or above on the exam, you will receive a GEN-DHSP certificate.

Time Table

Course	Duration (Day)
IP Solution Product Introduction Training	0.5
IP Solution Function Configuration Training	1
HDCVI Solution Product Introduction Training	0.5
HDCVI Solution Function Configuration Training	0.5
Transmission Product Introduction Training	0.5
DSS Express Function Configuration Training	1

Video Surveillance Engineer

Training and Certification

This course is devoted to assist clients in becoming familiar with general surveillance system products. It aims to improve the efficiency of equipment installation, function operation and configuration, and problem troubleshooting. At the same time, it helps clients learn how to accurately select products and engage in the system design of complete video solutions according to requirements.

GEN-DHSE

Candidates

Professionals who work with video design and support project implementation.

Requirements

Those people who is familiar with integrated video surveillance solution.

Duration

3 days

Objectives

- Familiar with the surveillance center products and VMS products.
- Familiar with the formation of integrated video surveillance solutions. Able to complete solution design and product selection according to project requirements.
- Familiar with video management configuration for large scale project: device management, account management, storage management, system linkage, TV wall, E-map, etc.

Training Tracks

Theory+ Practice →

After completing this course and scoring over 140 or above on the exam, you will receive a GEN-DHSE certificate.

Time Table

Course	Duration (Day)
Surveillance Center Product Introduction Training	0.5
Video Surveillance Solution Design Training	0.5
Video Management System Configuration Training	2
