R&D Capability

Innovation brings cool stuff and is the main driving force to keep things moving forward.

Dahua Technology attaches great importance to R&D and keeps on investing 10% of its annual sales revenue on its R&D. There are over 6000 professionals working in R&D and together holding over 800 patents, including 40 owned invention patents.

Dahua was the first company in China to launch 8-channel real-time embedded digital video recorder in 2001; Followed with sound development, Dahua grows into a total solution provider, including front-end cameras to back-end devices, along with versatile softwares. To-date, there are six core technologies that Dahua accomplishes; they are technologies on embedding, image processing, storage, intelligence, network and pre-treatment.

Six Core Technologies

Manufacturing / Quality Control

If a product or service is deemed a piece of gorgeous dress, then QC is the stitches, which have to be consistent and cautiously made.

Lean Manufacture

- > SMT Equipment from Siemens
- > Automatic Optical Inspection

Strict Quality Control System

- > Six Sigma
- > Reliable Quality Control
- > Green Manufacture Process
- > World Certificates: ISO 9001/14001/18000/UL/FCC/CCC/RoHS and etc.

Complete Product Portfolio

Surveillance industry evolves rapidly and moves towards high definition, intelligent and integrated solution. Dahua's vision is not only to "meet the trend", but also to "lead the trend".

Dahua Technology provides products and solutions in video surveillance, intelligent transportation system, smart home and etc. It makes continuous efforts to refine both its hardware as well as software and to cooperate with other world-leading players in order to provide more integrated solutions and comfortable operating experience to customers.

Open

Meanwhile, Dahua Technology, as a key market player, is willing and open to cooperate with others and aims to build up scalable system, which is easy to expand, even across brands.

Dahua advocates product inter-operability and actively involves in international standard committees, such as ONVIF, PSIA and HDcctv alliance in order to optimize the resources and maximize the value for the vertical industries and clients.
