Series Overview

Equipped with dual-sensor construction and multispectral merging technology, Dahua Polar Light series network camera can realize color imaging in the environment of low illuminance to provide better experience. Based on deep learning algorithm, the camera supports various intelligent functions, such as precise classification of human, motor vehicle and non-motor vehicle, face recognition, and face detection, to meet different needs of customers. The camera has ultra-starlight night vision, ultra-low bit rate, complying to the standards of IP67.

Functions

Polar Light 2.0

With multispectral merging technology and image merging algorithm, Dahua Polar Light 2.0 technology can realize color imaging in the environment of ultra-low illuminance to provide better experience.

Multi-Spectrum Fusion

Dahua Multi-Spectrum Fusion technology extracts the details and brightness of the visible spectrum and infrared spectrum to make the fusion brightness close to the visible light brightness, so that the camera provides a better image.

Dual Light Fusion

Dahua Dual Light Fusion technology integrates the light sources of different waves. With good illumination, it meanwhile can minimize the light pollution to avoid dazzle problem. The camera provides multiple illumination solutions to satisfy different demands.

Face Recognition

Dahua Face Recognition technology extracts the features of captured faces and compares them with that in face database to recognize the person identity.

Face Detection

Dahua Face Detection technology can detect the face in the image. With deep learning algorithm, the technology supports detecting, tracking, capturing and selecting the best face image, and then outputs face snapshot.

Video Metadata

With deep learning algorithm, Dahua Video Metadata technology can detect, track, capture vehicle, non-motor vehicle and people, and select the best images, and extract attributes.

Cyber Security

Dahua network camera is equipped with a series of key security technologies, such as security authentication and authorization, access control, trusted protection, encrypted transmission, and encrypted storage, which improve its security defense and data protection, and prevent malicious programs from invading the device. With UL CAP Certification, TÜV Rheinland Protected Privacy IoT Product Certification, and ETSI EN 303645 Certification, Dahua network camera better meets the demands of cyber security and privacy protection.
