Functions

Anti-vibration
Using shock-absorbing material and structure, the new designed hard disk box can cope with varying degrees of vibration, keeping the system work normally all the time.

Wide range of power supply
As the voltage output of vehicle battery changes during driving, the wide range of power supply can protect the device.

3G/4G/WIFI
Embedded with 3G/4G/WIFI module, the device can register into a public network to connect with VMS, and can send all the information (video/audio/alarm/gps) through wireless network.

GPS
Embedded GPS module can receive location information and upload to VMS. Even when the device is offline, it can upload the information after it’s online again and the vehicle can be tracked on the electric map of VMS.

Multiple ports
With kinds of ports, like RS232, RS485, I/O, the video recorder can connect with various of accessories, such as card reader, fuel sensor, panic button and so on, so that the video, audio, alarm and location information can be uploaded to VMS.
