# Higher Image Resolution, Better Intelligent Experience

Dahua WizSense 4K IP camera

**Better Image**

**SMD Plus**

**Perimeter Protection**

**Smart Codec**

## Better Image

- The WizSense 4K camera offers 4 times the normal 1080p resolution, providing more pixels and a clearer image. It can clearly capture details of targets that brings better visual experience to users.

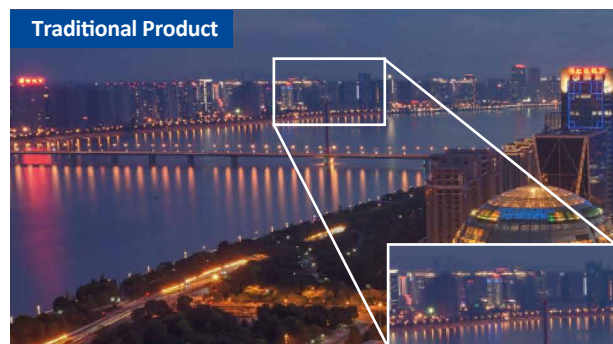

- The WizSense 4K camera generates max. 25-30 frames, which does not only meet the requirements of ultra-high definition image quality, but also brings better visual experience.

*Outputs max. 4K (3840 × 2160) @25/30 fps (AI disabled), and max. 4K (3840 × 2160) @20 fps (AI enabled).*
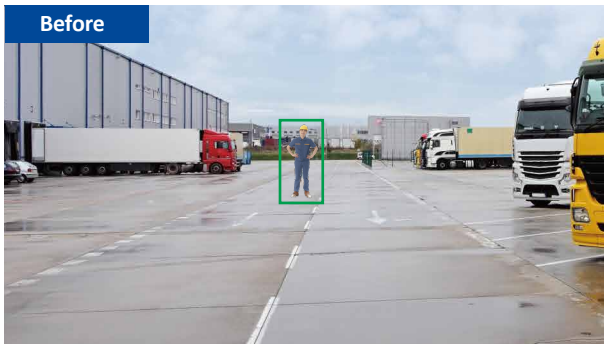

- The WizSense 4K camera has a better low light effect than the traditional product, making the image look clearer at night.
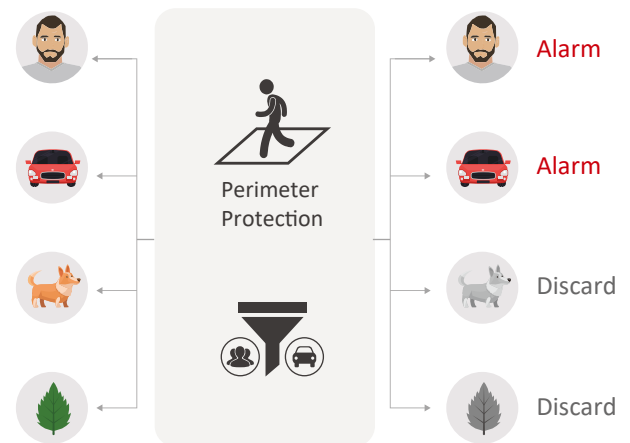

## SMD Plus

- SMD Plus is equipped with an optimized algorithm, SMD V2.0 Algorithm, which improves the detection distance and detection rate of targets. It makes the false alarms rate lower, providing a better user experience.

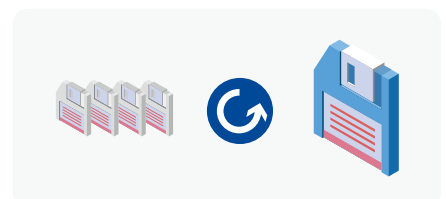

## Perimeter Protection

- Perimeter Protection is based on AI algorithm and focuses on human and vehicle. It offers efficient and stable detection performance, providing users with intelligent functions such as accurate detection, target classification, quick target search, and real-time remote monitoring.

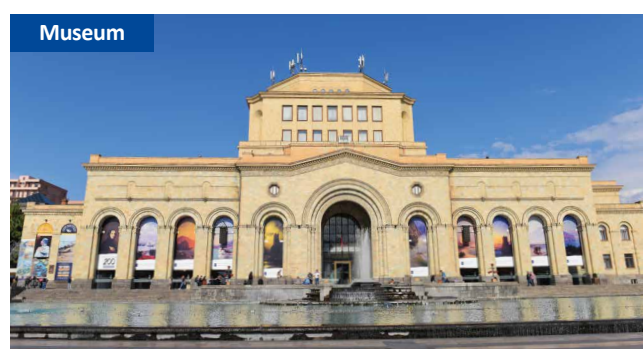

## Smart Codec

- Smart H.265+/H.264+ function greatly reduces video bit rate and guarantees the image quality of targets. The reduction of bit rate also reduces video storage space, saving users the costs of video storage device.

## Applications

**School**

**Factory**

**Villa**

**Museum**
